AI for Bharat Hackathon

Powered by aws

Team Name : ASTech

Team Leader Name : Akansha

Problem Statement : AI for Communities, Access & Public Impact

SamarthBharat

🎯 The Challenge

🌾 Farmers & Agricultural Workers

Struggle with crop disease identification, accessing market prices, and discovering government subsidies

📚 Students

Limited access to quality coaching, exam resources, and scholarship information

👷 Workers

Unaware of labor rights, welfare schemes, and grievance mechanisms

🚀 Early-Stage Startups

Navigate complex compliance, miss funding opportunities, lack mentorship access

Core Problem: Information asymmetry prevents millions from accessing critical resources, opportunities, and support systems already available to them.

💡 Our Solution

Multi-channel AI platform designed for accessibility: works on any device, any network, in any Indian language.

- ✓ **Voice-First:** Speak naturally, AI auto-detects language
- ✓ **Network Adaptive:** Optimized for 2G/3G connections
- ✓ **Zero Download:** WhatsApp, SMS, IVR access
- ✓ **Smart Vision:** Instant crop disease diagnosis from photos
- ✓ **Scheme Matching:** Personalized government program recommendations
- ✓ **Proactive Alerts:** Weather, prices, deadlines via preferred channel
- ✓ **True Multilingual:** 10+ Indian languages with cultural context

AWS Bedrock | Claude AI | Google STT/TTS | Twilio | PostgreSQL | MongoDB | Redis

Your solution should be able to explain the following:

- Why AI is required in your solution?
- How AWS services are used within your architecture?
- What value the AI layer adds to the user experience?

List of features offered by the solution

It is always better to add a few visual representations (drawings/sketches/illustrations etc.) to your presentation, it adds to the power through which it reaches the audience.

Process flow diagram or Use-case diagram

Add a flow diagram or a use case diagram or an architecture diagram.

Wireframes/Mock diagrams of the proposed solution

Architecture diagram of the proposed solution:

Technologies utilized in the solution:

Estimated implementation cost (optional):

Snapshots of the prototype:

Prototype Performance report/Benchmarking:

Additional Details/Future Development (if any):

Prototype Assets:

- GitHub Public Repository Link
- Demo Video Link (Max: 3 Minutes)
